o.k., there all sorted, and i do have some for the following:
National, Hallicrafters, gonset, rme, and a few others.
as before, \$10 first class,(will do better for 10 or more)
these are originals, not copies.
thank you

Subject: Grinding Crystals
Message-ID: <960526235231_310845414@emout13.mail.aol.com>

My project for this three day weekend has been to grind some old surplus crystals to move them up to the 40 M CW band. Before this project, all I had was a single rock that spoke 7035 KCs. So far, I have been successfull in coaxing one rock up to 7028 and another up to 7050 but, many other brethren were lost along the way. I seem to have no problem moving the frequency up the first 150 KCs or so but eventually the rock gives up the ghost. Does anyone have have any advice that will help me move the crystal frequency more

than 150 or 200 KC?

73's, Eric WD6DGX
